## Decision 1 Matching Graph Questions

1 (a) Draw a bipartite graph representing the following adjacency matrix.

|  | $\boldsymbol{U}$ | $\boldsymbol{V}$ | $\boldsymbol{W}$ | $\boldsymbol{X}$ | $\boldsymbol{Y}$ | $\boldsymbol{Z}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\boldsymbol{A}$ | 1 | 0 | 1 | 0 | 1 | 0 |
| $\boldsymbol{B}$ | 0 | 1 | 0 | 1 | 0 | 0 |
| $\boldsymbol{C}$ | 0 | 1 | 0 | 0 | 0 | 1 |
| $\boldsymbol{D}$ | 0 | 0 | 0 | 1 | 0 | 0 |
| $\boldsymbol{E}$ | 0 | 0 | 1 | 0 | 1 | 1 |
| $\boldsymbol{F}$ | 0 | 0 | 0 | 1 | 1 | 0 |

(b) Given that initially $A$ is matched to $W, B$ is matched to $X, C$ is matched to $V$, and $E$ is matched to $Y$, use the alternating path algorithm, from this initial matching, to find a complete matching. List your complete matching.

1 Five people, $A, B, C, D$ and $E$, are to be matched to five tasks, 1, 2, 3, 4 and 5 . The table shows which tasks each person can do.

| Person | Tasks |
| :---: | :--- |
| $A$ | $1,3,5$ |
| $B$ | 2,4 |
| $C$ | 2 |
| $D$ | 4,5 |
| $E$ | 3,5 |

(a) Show this information on a bipartite graph.
(b) Initially $A$ is matched to task $3, B$ to task $4, C$ to task 2 and $E$ to task 5 .

Use an alternating path from this initial matching to find a complete matching.

2 Five people $A, B, C, D$ and $E$ are to be matched to five tasks $R, S, T, U$ and $V$.
The table shows the tasks that each person is able to undertake.

| Person | Tasks |
| :---: | :---: |
| $A$ | $R, V$ |
| $B$ | $R, T$ |
| $C$ | $T, V$ |
| $D$ | $U, V$ |
| $E$ | $S, U$ |

(a) Show this information on a bipartite graph.
(b) Initially, $A$ is matched to task $V, B$ to task $R, C$ to task $T$, and $E$ to task $U$.

Demonstrate, by using an alternating path from this initial matching, how each person can be matched to a task.

1 Six people, $A, B, C, D, E$ and $F$, are to be matched to six tasks, 1,2,3,4,5 and 6 . The following adjacency matrix shows the possible matching of people to tasks.

|  | Task 1 | Task 2 | Task 3 | Task 4 | Task 5 | Task 6 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\boldsymbol{A}$ | 0 | 1 | 0 | 1 | 0 | 0 |
| $\boldsymbol{B}$ | 1 | 0 | 1 | 0 | 1 | 0 |
| $\boldsymbol{C}$ | 0 | 0 | 1 | 0 | 1 | 1 |
| $\boldsymbol{D}$ | 0 | 0 | 0 | 1 | 0 | 0 |
| $\boldsymbol{E}$ | 0 | 1 | 0 | 0 | 0 | 1 |
| $\boldsymbol{F}$ | 0 | 0 | 0 | 1 | 1 | 0 |

(a) Show this information on a bipartite graph.
(b) At first $F$ insists on being matched to task 4. Explain why, in this case, a complete matching is impossible.
(c) To find a complete matching $F$ agrees to be assigned to either task 4 or task 5 .

Initially $B$ is matched to task $3, C$ to task $6, E$ to task 2 and $F$ to task 4 .
From this initial matching, use the maximum matching algorithm to obtain a complete matching. List your complete matching.
